

## Course Description

This proposed workshop is designed to refresh the knowledge of basic minor oral surgery and sharpen the skills of dental officers. The mastery of basic minor oral surgical skills should be part of the core knowledge of all dental officers. This 1-and-a-half-days course focuses specifically on third molar surgery. This course will include discussion on infection control - aseptic technique, basic maxillofacial examination and documentation, flap design, suturing and clinical application of analgesics and antibiotics in dentoalveolar surgery.
