

MEDICAL SCIENCES STUDENTS SOCIETY (MEDCY)

Now that you are stepping up to another level of education which is the pre-university phase, it is the time to empower yourself with both knowledge and soft skills. Medical Sciences Students Society or better known as MEDCY is a platform where leaders are shaped. With a clear vision to substantiate professional muslims in accordance to Al-quran and Sunnah, this society is built for all medical sciences students in Centre for Foundation Studies, International Islamic University Malaysia(IIUM), Gampang Campus. The students that are part of our society are those from the programme of medicine, dentistry, pharmacy, nursing and allied health science.

Not as nerdy as it sounds, throughout the years of existence, MEDCY had organized a whole range of beneficial activities from educational, spiritual to physical events. As one of the leading academic based society here in CFS, we are bound to make sure that all of our members are able to be productive in their keen area and be fully equipped with needed skills before moving to the main campus. For 2019/2020 batch, the highlight of our society is the conducting of Euphoric Med-day that last for the whole day from early morning until the end of the night. This event was divided into three main activities which are Med Run, Exhibition on Sciences Experiments and Miracles of Love Letter Night. A complete trio of physical, educational and spiritual day that is open for all CFS students to discover more on the relationship between Science and our daily life.

In addition, we also conducted interesting activities such as blood donating programme, ifthar jamai with the members for every month, Medcy bond in the first semester to get to know each other better and last but not least the Annual Grand Dinner which is not possible due to the pandemic. There are a whole bunch of programmes that are possible to be done here in CFS that depends on the time, money and cooperation from the committees in order to make it a reality. Some of them that did not make it during our time are mock interview and also mentoring programme. Last but not least, in order to continue the great legacy of MEDCY, we are in hope that the future members will give their best to serve our beloved society.
